Self-Leveling Underlayments

Dependable offers professional grade self-leveling underlayments designed to ensure every installer delivers a superior subfloor for virtually any finished flooring material.

From traditional calcium aluminate products to innovative hybrid gypsum technology: Dependable offers a solution to the wide variety of challenges faced by contractors.

floorprep.com

Self-Leveling Underlayment Products

Our goal is to offer robust products with exceptional volume stability, surface finish, and flowability.

We are expanding the goal posts for contractors by offering non-shrinking technology for any application, and self-drying products where necessary.

Skimflow® NP

Premium Hybrid Gypsum Self-Leveling Underlayment

Skimflow NP (No Problem) was engineered to solve any leveling project. NP offers the flowability to handle thin commercial applications over concrete, and the stability for thick pours over wood.

Skimflow NP is designed with no-shrink hybrid technology to ensure durable underlayments that exhibit class leading volume stability for life, facilitating a pristine finish on every floor. No profile required, guaranteeing a superior installation and outcome - no problem.

Skimflow® LCB

Fiber Reinforced Self-Leveling Underlayment

Skimflow LCB (Liquid Cement Board) is a fiber reinforced product designed specifically for use over wood. LCB was engineered with tremendous flexural strength to handle any subfloor movements to ensure a durable bond, and a lasting subfloor. With LCB, no additional mesh is required. Mix, place, dry – and your wood subfloor is fortified and strengthened for any finished floor material.

Skimflow® LP

Hybrid Gypsum Hydraulic Cement Self-Leveling Underlayment

Skimflow LP is designed to address out of level or old damaged floors in residential, commercial, institutional and renovation environments. SKIMFLOW LP dries to a smooth hard surface that facilitates rapid application of flooring goods in as little as 16 hours.

LPs exceptional volume stability and bonding characteristics facilitate application in light foot and commercial traffic areas without requiring mechanical preparation of the substrate.
