

Project Profile

Commercial Office Space
Bloomington, MN

SkimFlow® NP

Pour Perfect, LLC is the Twin Cities' leader in sub-floor leveling, moisture mitigation and flooring underlayment solutions for residential, commercial and industrial applications with over 40 years of experience! The team, Steve Schluck and Andrew Herrmann, has adequate experience in their pre-flooring fabrication company offering moisture mitigation and underlayment installation services in the Twin Cities Metro, Minnesota and the Upper Midwest.

When a commercial property came to Pour Perfect, LCC needing to prepare the floors for the new carpet tiles to be installed into their renovated office spaces, Pour Perfect turned to FloorPrep.com underlayment SkimFlow® NP, with its suitability for finished flooring, such as carpet. NP offers flowability, excellent heal, and a robust character granting the installer peace of mind while providing a smooth, flat surface for demanding finished flooring projects.

Unlike other fast-track technologies, NP eliminates shrinkage, removing the need to mechanically profile the floor prior to installation, which was useful for a project this size (almost 20,000 square feet). Unlike traditional gypsum systems, SkimFlow® NP dries quickly to keep time sensitive commercial applications on schedule.

SKIMFLOW® NP (No Problem) is a hybrid cement self-leveling underlayment designed for time-sensitive projects, where compromised substrates make shrinkage undesirable. SKIMFLOW® NP offers no-shrink, no-profile, technology to fast-track jobs, without sacrificing performance.
