

Project Profile Riverfront Condos Nashville, TN

Products Used:

SkimFlow® NP
Primer A
Polyskim

Distributor: **East Bay Supply**

Nashville's Old Iron Works Plant represented a unique opportunity for conversion into contemporary condominium units.

Located just a mile from Nashville's infamous entertainment & hospitality center (featuring bar Broadway bars, restaurants, football stadium) the Riverfront Condos represent urban living in the heart of Nashville.

Given the Riverfront condos feature location, pool, fitness and unique covered parking - they have become very desirable for both Airbnb rentals and urban dwellers.

Specified luxury flooring used in the units required a subfloor with tight tolerances for "flat and smooth." Contractors turned to Skimflow NP for its superior flow and surface smoothness, as well as its excellent volume stability over compromised surfaces.

Skimflow NP dries quickly to keep time sensitive commercial applications on schedule. Skimflow NP's placement characteristics and finished outcomes are valued by both novice and professional contractors on the simplest or most demanding projects. NP just gives fantastic results, No Problem.
