

# Project Profile **OKC First National Center**

Products Used:

**Platform L3  
Primer 360**

Contractor: Icon Floor Prep

***"It's probably the most iconic building in Oklahoma City - certainly the one that was on the most postcards through the decades."***

**-Former Mayor Mick Cornett**

The project, a part of the restoration of the Art Deco "First National Bank Building" is now "First National Center," a mixed-use skyscraper. "It is a pleasure to participate in the restoration of this piece of American history," Todd Miller, VP of Sales.

Rapid leveling over properly prepared adhesive residue reduces cost while providing a sound substrate for finished flooring of choice. To ensure a leveled, solid floor, contractors turned to Primer P360 and Platform L3.

**P360 Primer**, a market leading bond strength on both porous and non-porous substrates, allows fast drying application of self-leveling underlayment in 45 - 90 minutes.

**Platform L3**, a premium, high flow, high strength self-leveling underlayment for flat smooth floors, allows for low surface preparation.
